# FROSTER LABEX<sup>®</sup> 330 PRO-ACTIVE

Explosion protection - Zone 2  
The interior is free of ignition sources

## Equipment

- 4 shelves
- Key switch
- Comfortable access
- Door frame heater
- Forced air cooling
- Rapid freezing cycle
- Automatic fast defrosting
- Digital temperature display
- Potential-free contact
- Visual and audible alarm signal
- Minimum/maximum temperature memory

## PRO-ACTIVE-Features

- Faster response time in the event of impending faults thanks to proactive alarms
- Data recording can be read out via USB interface using a USB stick and software
- Minimisation of temperature deviations in the interior
- Maximum storage safety thanks to harmonised components

## LABEX®-Devices

Our LABEX® models are the safest explosion-proof devices on the market that offer maximum temperature stability.

### INTRINSIC SAFETY

#### Protected probes

The probes are protected via safety barriers

#### Explosion-proof fan

energy limiting power supply

### CONSTRUCTIVE SAFETY

#### Earthing concept

The user is grounded as soon as the door handle is touched. Static charge is discharged into the housing

#### No spark formation

caused by moving parts (shelves or conductive drawers)

# Explosion protection

Our promise - your safety!

KIRSCH was the first company in the laboratory cooling sector to adapt to the new ATEX product directive 2014/34/EU.

The interior of the devices is tested for absence of ignition sources by TÜV SÜD in conformity with Directive ATEX 2014/34/EU:

- All of the electrical equipment and components used in the interior (fans, temperature sensors, etc.) are specifically designed for use in zone 1\* and zone 2
- We also guarantee the maximum temperature stability in explosion-proof interiors
- Intrinsically safe supply to the temperature sensors in the interior
- Explosion-proof fan
- Special earthing concept for discharging electrical potential
- Plastic parts in the interior have an antistatic design

(depending on the model)

\*LABEX 465

## Liability according to ATEX operator- and product guidelines

According to the ATEX operating directive, the plant operator is responsible for the correct selection of the equipment. For the determination of the suitable EX zone (e.g. Zone 1, Zone 2), following explosion hazards, among other things, have to be taken into consideration: the explosiveness of the stored substances and the frequency of occurrence of an explosive atmosphere.

We will gladly assist you in selecting the correct explosion protected device and provide you with the technical report of the TÜV-SÜD.

- **PRO-ACTIVE- Control:** Permanent, proactive monitoring of the performance data and alerts in the case of deviations – so that you can take countermeasures in good time before a fault threatens your chilled goods; world's most accurate temperature control in refrigerated areas thanks to two standard PT-1000 sensors.
- **External housing** made from galvanised sheet steel (rust-proof), with white, anti-scratch powder coating. Length of the plug cable: approx. 2.8 m.
- **Adjustable feet** to compensate uneven floors.
- **Interior** made from smooth aluminium with colourless protective coating. Gibs (every 15 mm) for flexible interior arrangement.
- **Interior equipment** can be customised (surcharge may apply). See optional equipment.
- **Extra-thick energy saving insulation**, made from high-quality, compression-moulded and environmentally friendly material.
- **Self-closing door** with easy-to-replace plastic magnetic seal frame, lockable.
- **Door hinge** on the right-hand side (by default, see illustration), or the left-hand side, can be retrofitted.
- **Forced-air cooling**, switches off automatically when you open the door, ensures a uniform temperature and minimizes temperature deviations.
- **Valve controlled pressure compensation** for easier door opening.
- **Automatic fast defrosting** thanks to time-limited and temperature-monitored reversal of the refrigerant circuit. Defrost sensors are protected by safety barriers.
- **Removable condensation container.**
- **Key switch** protected control panel against tampering. Membrane keyboard with digital temperature display and minimum/maximum temperature memory. Control and display sensors protected by safety barriers.
- **Warning functions** with visual and audible alarm signal in the case of temperature deviations or other malfunctions. Door open alarm after 60 seconds.
- **Power failure alarm** (visual and audible alarm), the monitoring unit remains in operation for approx. 30 hours on battery power.
- **Alarms** can be forwarded using a potential-free contact (e.g., to a mobile phone with optional KIRSCH EVOLUTION CLOUD module or to a control centre).
- **Data documentation** can be read via USB interface with KIRSCH Datanet software.
- **Rapid freezing cycle** ensures that the goods to be cooled are frozen quickly.
- **Ventilation-enforced refrigerating machine**, hermetically sealed, energy saving, low-noise, easy to service. Inlet air and exhaust air flow through the ventilation slits at the front.
- **Door frame heater** prevents icing of the door.

## Specification

Capacity	300 litres
Temperature setting	approx. -10 °C to -30 °C
Voltage	220 – 240 V, 50 and 60 Hz
Power consumption	540 watts
Normal consumption	4.33 kWh/24 h
Admissible ambient temperature	from +10 °C to +32 °C
Heat emission (max.)	660 watts
Exterior dimensions (including distance from wall)	w x d x h = 74 x 78 x 159 cm
Usable dimensions	w x d x h = 57 x 42 x 80 cm
Exterior dimensions with door open at 90°	w x d = 74 x 142 cm
Shelfsize	w x d = 57 x 42 cm
Max. load shelf	40 kg
Weight (net/gross)	125 kg/142 kg
Temperature deviation without defrosting	+/-0.85°C
Noise emission	51.2 dB(A)

## Optional equipment

KIRSCH refrigerators and freezers offer numerous equipment options that can be retrofitted.

### Castors

for easy handling and moving around.

### Decorative frame

Made of stainless steel, allows to cover door with a decorative panel (thickness max. 2 mm).

### Access Port

Simple insertion of an external temperature sensor with integrated cable feed-through.

### Additional Shelves

Wire shelves, robust with load capacity up to 40 and 50 kg.

## Accessories for temperature documentation

### PC-KIT-NET

Automatic temperature documentation and monitoring via your network (LAN connection).

### KIRSCH EVOLUTION CLOUD-Module

Maximum storage safety through optimal connectivity and real-time monitoring.

### External PT100/PT1000 with cold block

Additional temperature sensor for connection to existing/external monitoring system.

### Circular blade temperature recorder

Depending on the model, it is either installed in the machine compartment panel of the refrigerator or freezer or integrated into an additional housing attachment.
